Personal GPS Alarm Tracker

Help at the push of a button with the Caresafe Alarm

Whether you're at home or outdoors, anywhere any time.

Caresafe Alarms are small, fully mobile, Personal and Medical SOS devices. Simple to use pendants (or can be wrist worn) that workanywhere – not just at home.

NO contracts and no monthly fees.

- Personal SOS 4G and 3G (Australia-wide coverage*)
GPS Tracker with SIM.
- SOS button calls up to 5 emergency contacts (and texts HELP + Google Maps location) with 2 way speakerphone to talk.
- Talk button to call anytime.
- Check the trackers GPS location anytime.
- Automatic fall detection.
- Rechargeable batteries.
- No monthly monitoring fees.
- 2-way speakerphone.
- Weatherproof IP-67.
- 12 month warranty.
- Caresafe Alarm suitable to use the SIM card from any provider that use the Telstra 3G/4G' Australia wide network.

In an emergency, the user can press the SOS button on the device. The device will then notify up to 5 contacts by sending an SOS text message with a GPS Google map of the users location and will call each contact number one at a time until the call is answered.

The user can then talk hands-free to the contact. The device works anywhere there is 4G and 3G mobile coverage unlike similar devices which only use Wi-Fi. Enjoy the freedom to live life whilst knowing help is only the press of a button away. The user can also telephone any of the 8 contacts in a non-emergency situation, just as you would with a mobile phone.

Check the device location at any time by sending an SMS and receiving a GPS Google map reply.

Peace of mind for you and for your loved ones!

AVAILABLE
IN BLACK
OR WHITE

Caresafe Alarms are fully mobile personal medical alarms with advanced fall detection feature, suitable for the elderly, anyone walking alone at night, shift workers, children or those living with a disability. Our products work both at home and outdoors - anywhere, anytime.

These shower proof pendants allow two-way voice communication, will call and text alerts when activating the SOS button and have automatic fall detection. Stay safer with a Caresafe Alarm, wherever you are!

Using the latest communication technologies, these pendants let you raise an emergency alarm at the touch of a button so that you can get help quickly and easily, the moment you need it.

Caresafe Alarms do not require a landline connection and use mobile phone technology via a SIM card. We provide and install a prepaid Telstra Mobile \$2.00 SIM card.

The device is ready to use straight out of the box, simply activate your SIM card, load some credit onto your account and then program the device by following our easy guide instructions.

How Does It Work?

If you need help or emergency assistance, simply press the SOS button on the front of the device.

An SOS text message alert is sent to the nominated contacts. The text includes a Google Maps link which shows the location of the wearer at the time of activation.

The Caresafe Alarm will then call the 1st SOS contact. If the first number doesn't answer, the Caresafe Alarm will continue to call the 2nd contact, and then the 3rd etc. The Caresafe Alarm then allows two way, hands-free voice communication so the wearer can talk to the device directly and communicate with their contact.

Additionally, you can find out where the Caresafe Alarm is at any time by simply sending it a text message. The device will then automatically reply with an update on its location with a Google Maps link.
